Who Should Plan to Attend the Hydrogen Sulphide Awareness Workshop?

Anyone working in an intensive livestock operation or is involved with the handling of liquid manure. Specifically employees and owner-operators in the following sectors:

- Swine Industry
- Dairy Industry
- Liquid Manure Transportation

IMPROMPTU INFORMATION AND EDUCATION FOR ANYONE WHO WORKS WITH OR TRANSPORTS LIQUID MANURE

How can you benefit from the Hydrogen Sulphide Awareness Workshop?

- Increased workplace safety by increasing awareness of H₂S
- Discover the latest information in strategies to reduce H₂S exposure
- Opportunity to share H₂S related experiences that may help save a life
- Training is an investment in people

What will you learn with the Hydrogen Sulphide Awareness Workshop?

- H₂S gas, its properties and threat to human health
- How to be prepared
- How to work towards a safer workplace
- Rescue techniques and safety procedures
- Case study learning technique is lively and interactive

What Have People Said About the Hydrogen Sulphide Awareness Workshop?

“It never hurts to be reminded of the need to be aware and the procedures we are using right now.” • Saskatchewan Pork Producer

“I think we have become complacent in the workplace because nothing has happened.” • Saskatchewan Manure Handling Company

“Thank you for caring about what you do, it’s nice to have someone teaching this course that really cares about what we are doing in the barns and cares about our safety.” • Saskatchewan Pork Producer
